Rotomors Technology

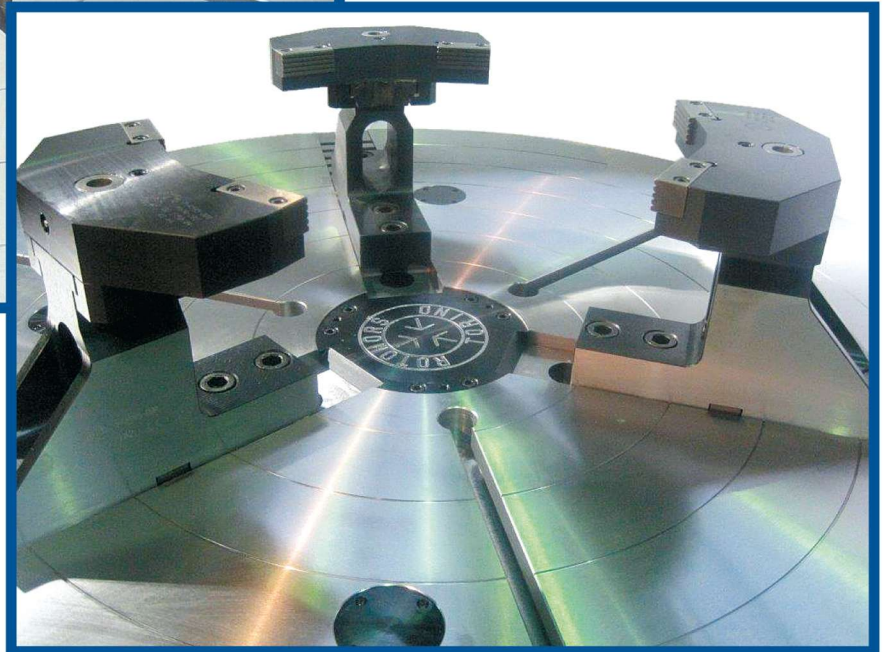

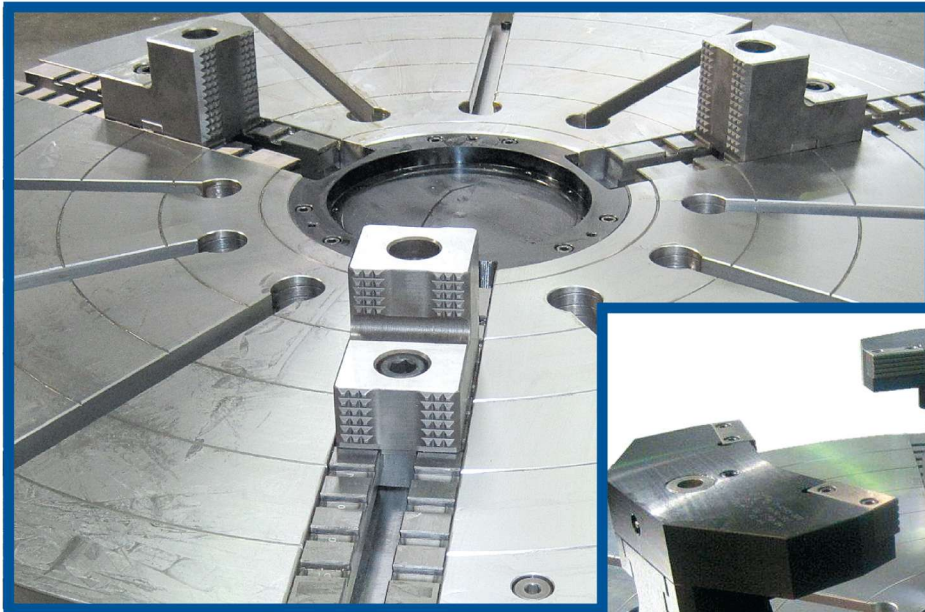

LARGE DIAMETERS

GD-M-3A

Strong clamping 3 self-centering jaws manual chuck

- **Manual lubrication.** Lubrication and cleaning of all ways are assured by a number of manual connections (under control of the operator).

Standard equipment: 1 set 3-jaws: for internal and external clamping.

Optional devices

This type of GD MANUAL LARGE DIAMETER CHUCK can be arranged, on request, with following devices:

- **Protected guides** with oil wiper packing to eliminate impurities on jaw guide surface.
- **Torque multiplier.** High gripping force can be achieved with the option of a torque multiplier (to increase the torque applied to the operating pinion).

On request we can study customized solutions. Non-binding data/sketches, subject to modifications or technical improvements
